About the Results Papers ZESSTA's six high quality results papers aim to give a taste of the facility's impact as well as distil the hard-earned lessons about implementation throughout its life. Each paper presents an in-depth look at a challenge faced, the responses considered, and the results achieved with the support of the facility.

How Does The BOD POD Work? The BOD POD is an Air Displacement Plethysmograph (ADP) that uses whole body densitometry to determine body composition (fat vs. lean). Similar in principle to underwater weighing, the BOD POD measures body mass (weight) using a very precise scale, and volume by sitting inside the BOD POD.

### **How Does The BOD POD Work? - Y Be Fit**

At the top of the Result Sheet is your client's™ basic body composition breakdown.. Depending on the model of InBody you're using, the breakdown may look a little different, but all models start with the smallest units on the left and gradually get into the bigger categories until you get to the total body weight on the far right.. In this example, taken from the InBody 770 Result Sheet ...
