Program management or programme management is the process of managing several related projects, often with the intention of improving an organization's performance. In practice and in its aims, program management is often closely related to systems engineering, industrial engineering, change management, and business transformation.. The program manager has oversight of the purpose and status of ...

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

British Council, 2018. 50 p. Aptis is an innovative global English assessment tool from the British Council. It is an English test for adults and young adults, which can be used to assess English language ability in all four skills – reading, writing, listening and speaking.

### **Project Management and Benefits Management - A Governance Based Framework**

In order to understand the relationship between project management and benefits management or between the process of project management and that of deriving benefits, a governance based framework is developed in the present paper to distinguish between the two processes (see Fig. 2, below). The process of realising benefits has a broader scope and longer life cycle than a project has (Zwikael ...)
