The Einstein field equations (EFE; also known as Einstein's equations) comprise the set of 10 equations in Albert Einstein's general theory of relativity that describe the fundamental interaction of gravitation as a result of spacetime being curved by mass and energy. First published by Einstein in 1915 as a tensor equation, the EFE relate local spacetime curvature (expressed by the Einstein ...

History. Historically, equations of motion first appeared in classical mechanics to describe the motion of massive objects, a notable application was to celestial mechanics to predict the motion of the planets as if they orbit like clockwork (this was how Neptune was predicted before its discovery), and also investigate the stability of the solar system.

Abstract: In this paper, we are concerned with the fractional order equations (1) with Hartree type

$\dot{H} \in \frac{L^2}{2}$ -critical nonlinearity and its equivalent integral equations (3). We first prove a regularity result which indicates that weak solutions are smooth (Theorem 1.2).

La relativité galiléenne est un principe physique exprimé par Galilée au XVII^e siècle, sans être alors nommé ni principe, ni relativité. Il sera présenté par Galilée comme une propriété que confirme l'expérience. Selon ce principe, les lois de la physique restent inchangées dans des référentiels dénommés depuis « galiléens ».
