Social geography is the branch of human geography that is most closely related to social theory in general and sociology in particular, dealing with the relation of social phenomena and its spatial components. Though the term itself has a tradition of more than 100 years, there is no consensus on its explicit content. In 1968, noted that "[w]ith some notable exceptions, (...) social geography ...

Psychogeography is an exploration of urban environments that emphasizes playfulness and "drifting". It has links to the Situationist International. Psychogeography was defined in 1955 by Guy Debord as "the study of the precise laws and specific effects of the geographical environment, consciously organized or not, on the emotions and behavior of individuals."
