how computers changed the pdf

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

3 ICT enhancing teaching and learning process The field of education has been affected by ICTs, which have undoubtedly affected teaching, learning and research (Yusuf, 2005) .ICTs have the potential to accelerate, enrich, and deepen

An Effective use of ICT for Education and Learning by

A computer is a machine (mostly electronic) that is able to accept data as input, process that data using predefined algorithms and data structures, and perform tasks as output - including the transformation of raw data into information, then knowledge, and finally insight about the data's domain. Output also takes the form of the performance of physical tasks, as well as data storage, data ...

Computer - Simple English Wikipedia, the free encyclopedia

Computers in the classroom include any digital technology used to enhance, supplement, or replace a traditional educational curriculum. As computers have become more accessible, inexpensive, and powerful, the demand for this technology has increased, leading to more frequent use of computer resources within classes, and a decrease in the student-to-computer ratio within schools.

Computers in the classroom - Wikipedia

The PDF file format is specifically created to solve this problem. PDF, which stands for "Portable Document Format", is designed to display exactly the same everywhere, even across different operating systems, no matter what your system or printer characteristics.
