Basic tools to get: hammer, chisels, sandbags, files (aka rasps or rifflers), and maybe a saw. There are many different tools that can be used while carving stone. Beginners, however, don't need them all. Most shops catering to sculptors will sell beginner's kits consisting of a hammer, a few chisels, and a few files.

Apply polyurethane. Insert a darning needle into the bottom of the bird to give you something to hold. Then, apply a light coat of polyurethane to the carving and allow the finish to dry thoroughly. Buff the carving with synthetic steel wool, apply another coat of finish, and let the finish dry thoroughly.

woodcarving. Even though many manufacturers of woodcarving tools supply their products ready sharpened, I would recommend that you spend time, right from the very start, learning how to maintain the cutting edge to get the best results from your tools. If your tools are not razor sharp, it will make learning to carve difficult and frustrating.

foot. While you are carving this section, also carve and define the edge of the talons to make the width of the talons 1/2" (you can base this off the drawings on the bottom of the foot). STEP 8: Draw a line 7/8" up from the bottom of the ball on all 4 sides of the newly carved cylinder. This will locate the midpoint of the ball. The round-

Round and raise areas with a beveler. Use the beveler tool to round off any previously carved lines. While not strictly necessary, beveler tools should be used on nearly every leather carving. Always hold the beveler at a

straight, vertical angle. The deepest part of the wedge tip should be placed inside the cut.
