

identifying slopes y intercepts pdf

This is a great activity for practicing slope-intercept form. Students put together matches from cut up squares that consist of graphs, equations, words, and "m" and "b" values. A "match" can contain any combination of two of these. Students will practice skills identifying slopes and y-intercepts in equation form and in graph form.

A five-factor model directed at capturing the size, value, profitability, and investment patterns in average stock returns performs better than the three-factor model of Fama and French (). The five-factor model's main problem is its failure to capture the low average returns on small stocks whose returns behave like those of firms that invest a lot despite low profitability.
