

implementing sustainable urban travel pdf

Smart growth is an urban planning and transportation theory that concentrates growth in compact walkable urban centers to avoid sprawl. It also advocates compact, transit-oriented, walkable, bicycle-friendly land use, including neighborhood schools, complete streets, and mixed-use development with a range of housing choices. The term "smart growth" is particularly used in North America.

Our future is set to be urban. Today, more than half of the population live in urban areas and 1.5 million people are added to the global urban population every week. A staggering 90% of this urban population growth will take place in African and Asian countries with rapid urbanisation placing huge demands on infrastructure, services, job creation, climate and environment.
