International Trade and Its Effects on Economic Growth in

"International economic law" is an increasingly seminal field of international law that involves the regulation and conduct of states, international organizations, and private firms operating in the international economic arena. As such, international economic law encompasses a broad range of disciplines touching on public international law, private international law, and domestic law ...

International economic law - Wikipedia

International economics is concerned with the effects upon economic activity from international differences in productive resources and consumer preferences and the international institutions that affect them. It seeks to explain the patterns and consequences of transactions and interactions between the inhabitants of different countries, including trade, investment and migration.

TRADE LIBERALISATION UNDER STRUCTURAL ECONOMIC ADJUSTMENT

On the topic of international trade, the views of economists tend to differ from those of the general public. There are three principal differences. First, many noneconomists believe that it is more advantageous to trade with other members of oneâ€™s nation or ethnic group than with outsiders. Economists see all forms of trade as equally [â€™]
