An Introduction to Basic Statistics and Probability â€” p. 11/40. ... Parameters vs. Statistics A parameter is a number that describes the population. Usually its value is unknown. A statistic is a number that can be computed from the ... Probability density function  $f(x) = 1$

### **An Introduction to Basic Statistics and Probability**

Chapter 1: Introduction to Statistics . Variables â€” A variable is a characteristic or condition that can change or take on different values. â€” Most research begins with a general question about the relationship between two variables for a specific group of individuals.

### **Chapter 1: Introduction to Statistics - Welcome to myCMU**

collected only. Inferential statistics is used to make predictions or comparisons about a larger group (a population) using information gathered about a small part of that population. Thus, inferential statistics involves generalizing beyond the data, something that descriptive statistics does not do.

### **Introductory Statistics - Saylor Academy**

Introduction A set of data on its own is very hard to interpret. There is lots of information contained in the data, but it is hard to see. We need ways of understanding important features of the data, and to summarise it in meaningful ways.

### **Introduction to Statistics - Newcastle University**

Descriptive statistics are procedures used to summarize, organize, and make sense of a set of scores or observations. Descriptive statistics are typically presented graphically, in tabular form (in tables), or as summary statistics (single values). Data (plural) are measurements or observations that are typically numeric.
