The Telephone Network An Engineering Approach Ref: Digital Telephony (John Bellamy) and Fundamentals of Telecommunications (R. L. Freeman) Introduction to Telecommunications Network Engineering (Second Edition), (Anttalainen, Tarmo)

The Telephone Network - University of Texas at Dallas
In telephony, a service switching point (SSP) is the telephone exchange that initially responds, when a telephone caller dials a number, by sending a query to a central database called a service control point (SCP) so that the call can be handled. The service switching point uses the Signalling System No. 7 (SS7) protocols which are responsible for the call setup, management, and termination ...

Service switching point - Wikipedia
The Trimline telephone is a series of telephones produced by Western Electric, the manufacturing unit of the Bell System, and first introduced in 1965.It was designed by Henry Dreyfuss Associates under the project direction of Donald Genaro; the firm had designed all previous desktop telephone models for the American Telephone & Telegraph conglomerate.
