its your hormones the pdf

A hormone (from the Greek participle *hormō*, "to set in motion, urge on") is any member of a class of signaling molecules produced by glands in multicellular organisms that are transported by the circulatory system to target distant organs to regulate physiology and behaviour. Hormones have diverse chemical structures, mainly of 3 classes: eicosanoids, steroids, and amino acid ...

The following is a list of the most cited articles based on citations published in the last three years, according to CrossRef.

Allergy - Wiley Online Library

Midlife women have been led to believe that hormone replacement therapy is an either or proposition: either you take it or you suffer the symptoms of menopause.. In reality, however, women do not have to be plagued by hot flashes, night sweats, brain fog, depression and weight gain as they go through menopause.

Eating Your Way To Hormonal Balance - GreenMedInfo

There's a lot of discussion regarding hormones and the ketogenic diet. This article explores how being in ketosis may help alleviate hormonal imbalances.

Hormones and the Ketogenic Diet - Perfect Keto

The hormonal theory of sexuality holds that, just as exposure to certain hormones plays a role in fetal sex differentiation, such exposure also influences the sexual orientation that emerges later in the adult. Prenatal hormones may be seen as the primary determinant of adult sexual orientation, or a co-factor with genes, biological factors and/or environmental and social conditions.
