JBoss AS 7 Configuration, Deployment and Administration

I have already written about my First Impressions of Book 'JBoss AS 7 Configuration, Deployment and Administration' and in this post I review the book in greater detail while attempting to minimize how much I repeat from that post. My review is based on an electronic (PDF) copy of JBoss AS 7: Configuration, Deployment, and Administration.

Book Review: JBoss AS 7: Configuration, Deployment, and

JBoss AS 7 Configuration, Deployment and Administration will give you an expert's understanding of every component that makes up the JBoss application server, and will show you how to use them, helping you to dramatically cut down the learning curve for this exciting product.

JBoss AS 7 Configuration, Deployment and Administration

Configure Logging in JBoss Application Server 7. JBoss Application Server 7 logging can be configured in the XML configuration files, the web console or the command line interface. You can get more detail on the Logging Configuration page. Turn on debugging for a specific category:

Getting Started Guide - JBoss AS 7.2 - Project

For example, the logging subsystem configuration includes a reference to the "jboss.server.log.dir" path that points to the server's "log" directory. JBoss AS 7 automatically provides a number of standard paths without any need for the user to configure them in a configuration file:

General configuration concepts - JBoss AS 7.1 - Project

Hey, Where are my clusters? All clustering services start on demand and stop when no longer demanded Lifecycle example Deploy app1, starts channel and cache
