

labour market segmentation in pdf

Labor market segmentation is the division of the labor market according to a principle such as occupation, geography and industry.. One type of segmentation is to define groups "with little or no crossover capability", such that members of one segment cannot easily join another segment. This can result in different segments, for example men and women, receiving different wages for the same work.

Discrimination in the labour market exists in many forms: the 'glass ceiling', ageism, racism, and so on. This free course, Economics explains discrimination in the labour market, will help you look at this problem from a new perspective: through economics.

Economics explains discrimination in the labour market

Manual labour (in British English, manual labor in American English) or manual work is physical work done by people, most especially in contrast to that done by machines, and to that done by working animals. It is most literally work done with the hands (the word "manual" comes from the Latin word for hand), and, by figurative extension, it is work done with any of the muscles and bones of the ...
