efforts were made to study implementation and the processes of bureaucracy in a scientific manner. On the political side, the focus was on de-signing governmental institutions, that is, creating the institutions that would formulate, adopt, and implement policy. The latter was inherently prescriptive.

science is summarized after the fact – in textbooks and journal articles – than how science is actually done. The simplified, linear scientific method implies that scientific studies follow an unvarying, linear recipe. But in reality, in their work, scientists engage in many different activities in many different sequences.

### **PB 1 How science works - Understanding Science**

Science (from Latin scientia, meaning "knowledge") is a systematic enterprise that builds and organizes knowledge in the form of testable explanations and predictions about the universe.. Modern science is typically divided into three major branches that consist of the natural sciences (e.g. biology, chemistry, physics), which study nature in the broadest sense; the social sciences (e.g ...
