Understanding Textile Fibres and Their Properties: What is

Textile fibres can be created from many natural sources, as well as semisynthetic methods that use naturally occurring polymers, and synthetic methods that use polymer-based materials, and even minerals such as metals to make foils and wires. The textile industry requires that fibre content be provided on content labels. These labels are used to test textiles under different conditions to meet safety standards, and to determine whether or not a textile is machine washable or must be dry-cleaned.
