General Information Theory and Applications of Correspondence Analysis, by Michael Greenacre (Academic Press, 1984), has been regarded as an "encyclopedic" treatment of correspondence analysis, and was one of the first books on this topic to be published in English.

THEORY AND APPLICATIONS OF ROBUST OPTIMIZATION 467 (since there are more constraints to satisfy) and the smaller the loss probability p loss. Central themes in RO include understanding how to structure the uncertainty set R with loss probability p loss. Section 2 is devoted to the tractability of different types of uncertainty sets.

"Density matrix theory and its applications in NMR spectroscopy" Farrar and Harriman, Farragut Press, Madison, WI (1991). The Bloch equations provide a good physical interpretation to an NMR experiment when there is no spin-spin (scalar or J) coupling. However, the simple picture completely breaks down in the absence of coupling.
